Dev Mobile

Types: 1) native

2) cross-platform

3) pwa

1) na tive: and coid: java on kotlin

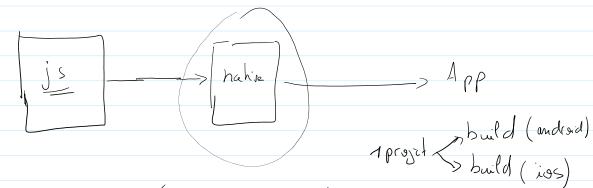

Ios: objected C on Swift

+ Performance

100% learnes (Telephone)

- b: (ost)

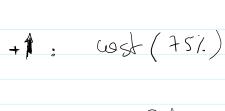

2) cross-plat form:

=> (each native (js, HTML, CSS)

=> flutter

= Unity30 (C#)

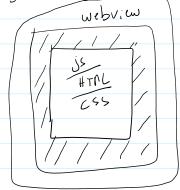

-1: 2 Performance Lectures

=> publication (Pative Installation (cross-platform)

a Android > playstile (se unisé)

« Ios — » Appstrae

3) pwa: Progressive Web application (Angular)
Hybrid
Leact

Service worker

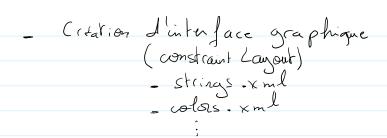

update/Installation (one st pas obligé de passer par les tre)

- !: Performance

Leatmee

Plan: Installation 2 configuration

- Création d'un premieu projet (Hello world) Structure du projet executer sur Telephone

- Activity (Page) => cycle de vie
- Evenements (Injection de dependence)

 +
 3 hiers
- _ liaison entre Achivity
